2000 Analytical Review DWCCA-2160-PJL

Dear Ms. Karbula:

The Public Service Commission staff is in the process of completing an analytical review of your utility's 2000 annual report. The purposes of an analytical review are to detect possible reporting or accounting related errors and to identify significant fluctuations from established trends in reported data not sufficiently explained in the annual report. It is our hope that this review will supply information that will enable us to better provide guidance to your utility regarding proper utility accounting and the preparation of future annual reports. In order to complete this review, we request the following information:

1. As directed in the head notes of the Balance Sheet End-of-Year Account Balances schedule on page F-18, please provide a more detailed description of the \$2,076 reported in Account 233 and follow this procedure in the future. Please also note that anytime there is not enough room for the explanation on the Particulars line, a schedule footnote should be added to provide further room for explanation.

2. The Public Service Commission of Wisconsin is establishing a database and guidelines for the average cost of meters. Based upon a review of your utility's data, the average cost of meters was \$239. Please provide copies of invoices for the 3 meters installed in 2000. In addition, please provide the average cost to install the meters. Thank you for your cooperation with our meter project.

We appreciate your cooperation in providing the above information. These recommendations are intended to provide accounting assistance and should not be construed as criticisms of utility personnel. If you have any questions, please feel free to contact me at (608) 267-9198. Please respond within 60 days of this letter. We prefer that you respond by e-mail if it is convenient

for you to do so. My e-mail address is peter.leege@psc.state.wi.us. If we have no questions regarding your response, you can consider the review closed.

Sincerely,

## WATER OPERATING SECTION FOOTNOTES

---

### Water Operation & Maintenance Expenses (Page W-05)

Account 640, Supplies and Expenses, was higher this year because costs were up.

Account 650, Repairs to Water Plant, was higher this year because there was a water pipe break in 2000 that required extensive repairs.

Account 680, Administrative and General Salaries, varied from prior years because in 2000 only one person's salary was charged to this account. In prior years, two people had salaries charged to this account.

Account 682, Outside Services Employed, was higher than in past years because the city had a dehumidifier installed.

---

### Property Tax Equivalent (Water) (Page W-07)

Property tax equivalent is forgiven by the general fund.

---

### Water Services (Page W-16)

The costs for these services were incurred in prior year. The customers just hooked up this year, therefore we are not adjusting the services account in the current year.

---

### Hydrants and Distribution System Valves (Page W-18)

Less than half the distribution valves were tested during the year due to lack of time because of employee turnover.
